Executive Director
for The Data Center
(a project of Nonprofit Knowledge Works)

The Data Center is the most trusted resource for data about greater New Orleans and Southeast Louisiana. Founded in 1997, we are fully independent, and we are experts at bringing data together from multiple sources to take a 360-degree look at issues that matter most to our region from the government, business, nonprofit, and community perspectives.

The Data Center is as good at getting data out as it is at putting it together. We assemble information in a way that is easy to understand and to the point. Our reports regularly reach over 100,000 individuals, including neighborhood leaders, members of the media, elected officials, business leaders, and other researchers. In these ways, The Data Center realizes its mission to build prosperous, inclusive, and sustainable communities by making informed decisions possible.

The Data Center’s areas of expertise include disaster recovery, regional economic analysis, workforce development, racial disparity indicators, and coastal population movements.

JOB SUMMARY
The key function of the Executive Director position is to guide The Data Center’s mission of democratizing data into realistic action, ensuring quality standards and ongoing impact of the organization. As the public image of the organization, the function of Executive Director is realized through the development of strategic partnerships and collaborative efforts to ensure the appropriate range of applied and relevant community-based projects will drive decisions for sustainability in the region and will reach intended target audiences. The Executive Director reports to a Board of Directors and is the leader of The Data Center’s management team.

KEY DUTIES AND RESPONSIBILITIES
The list below reflects essential accountabilities for the role of Executive Director. It shall not be construed as a detailed description of all work requirements associated with the job.

- Develop or secure expertise needed to execute data analysis projects.
- Provide continuing pro-active leadership to The Data Center Board of Directors and staff to ensure that the mission responds to current community needs and reaches target audiences
- Provide leadership for key data-centered initiatives that focus on long-term impact and that promote sustainability in the products and services provided
- Develop and maintain relationships with civic organizations, business leaders, elected leaders and government agencies that have an interest in The Data Center’s data analysis.
- Interact with community leaders, identifying changes in the community served by The Data Center
- Maintain membership on the Board of Directors and its Executive Committee as well as all Board committees
- Meet with the Board of Directors to improve and oversee ongoing governance of the organization
- Act as a liaison between the organization and a range of external stakeholders

CORE COMPETENCIES
The competency indicators below reflect essential skills, knowledge, and abilities necessary to effectively fulfill the expectations of the Executive Director.

Clear Communication: Written, Oral, Interpersonal
- Speak, listen, and write in a clear, and thorough manner using appropriate and effective communication tools and techniques
- Communicate directly, openly, regularly and timely with all clients, constituents and the community
- Effectively communicate the work of the organization with key stakeholders
- Act as a spokesperson for The Data Center
- Conduct official correspondence on behalf of the Board as appropriate and jointly with the Board when appropriate

Maintaining a Culture of Excellence/Ethics/Quality Focus
• Promote a culture of high performance and continuous improvement that values learning and a commitment to quality
• Set high standards of performance for team, self
• Set and maintain organizational quality standards of products and services
